

Indoor Reality Announces New Website Launch

Berkeley, California, June 14, 2017 – Indoor Reality announced today the launch of its completely revamped website. The newly designed layout provides global visitors a comprehensive and user-friendly experience while offering quick and easy access to essential information on the Company's 3D indoor mobile mapping solutions.

The new website has a clean sleek look, improved functionality, and enhanced application specific content built around the Company's core professional market segments. The new website goes live today, June 14, 2017 and is located at the same address: <http://www.indoorreality.com/>.

"We are excited about our new website launch and the robust information it provides for customers, investors, partners, and media to better understand Indoor Reality's best-in-class indoor mobile mapping technology," said Avidah Zakhor, Founder and CEO. "We believe this new site will allow our visitors to have a highly educational experience as we continue to drive adoption and grow our market presence."

Indoor Reality's new website will be updated on a regular basis with news of product enhancements/ releases, business activity, events, and media information. Visitors are encouraged to explore the new website to familiarize themselves with the expanded (new) content and submit a request for additional information based on their enterprise 3D documentation needs.

About Indoor Reality
